## NOUVEAU TEXTE DE MAITREYA RAEL

**MAITREYA LAUNCHES A NEW POLITICAL SYSTEM WHICH IS THE PERFECT SOLUTION TO THE WORLD ECONOMICAL AND FINANCIAL CRASHES AND THE EXPLOSION OF NEW TECHNOLOGIES MAKING MONEY AND WORKFORCE OBSOLETE: THE PARADISM**

Paradism is a political system that is similar to communism but has no “proletariat.” In a paradist system, robots, nanobots and computers take the place of the proletariat or workforce.

Paradism is based on new technologies, such as robotics, genetic engineering and nanotechnologies.

All production, tools, services and resources that can be efficient without even one human involved can be nationalized.

The nationalization of all production, services and tools provided by robots renders money obsolete since these products, services and tools can now be free.

Communism failed because the very existence of a proletariat created inefficiencies. Without the motivation of financial gain, the population had no incentive to work hard or to come up with creative solutions. Automated production eliminates this problem because computers and robots can be programmed for 100 percent efficiency. In addition, they can be more productive and active than human beings since they do not need rest, sleep or time off for holidays.

Paradist nationalization includes all land and housing, with the exception of family homes.

In a paradist system, elected politicians work only because they are devoted to humanity. They have no financial advantage or powers.

Paradism must first be accepted democratically by a population that understands the advantage of a world without money, where everything is available to every person free of charge.

For example, robots already produce cars worldwide with very few humans involved, and even those few will soon be completely replaced by robots.

The same is true for food. Vegetables produced on farms will be harvested by robots, with technology that already exists. Robotized trucks can then deliver the produce directly to consumers, who will select what they want online.

Services will be provided exactly the same way. For example, surgeon robots are already performing tasks more precisely than human surgeons can.

Everything a human being can do can be done better by robots.

Therefore, instead of working only for money, human beings can let all work be accomplished by robots and use their lives to do what they like – creating, doing research and studies, pursuing the arts, or meditating and achieving self-development. Under these conditions, the world will finally reach the level of paradise. That is why this system is called paradism.

A paradist system is already in place on the Elohim Planet, and it is the only possible next step for humanity. It is a process that leads to mondialization (nationalization on a worldwide scale). Nationalization in a paradist process leads naturally to a world government, under which the mondialization of all world resources is a matter of simple justice for all Humanity.

I hope many people will start paradist political parties around the planet and promote this idea. Paradism is coming soon anyway. But the sooner it comes, the better, for it can avert the additional human suffering that will otherwise result from the more terrible and devastating economic crashes that still lie ahead, when all economic and financial systems currently in use fail worldwide.

RAEL, August 30, 64ah

**ON AUGUST 31ST, MAITREYA COMMENTED ON THIS NEW POLITICAL SYSTEM DURING A MEETING HE HAD WITH LOCAL RAELIANS IN TUSCANY.**

“ We will launch this new political system that is more adaptable right away and that comes at the right moment; like anything that comes from above; concerning the world’s economical problems. We must prepare humanity for the arrival of this new era with no work and no money. Raelians are there to prepare the future of humanity. This system is not

for tomorrow, but for the day after tomorrow. Paradism replaces communism, to make earth into a paradise. This is indeed what we are preparing.”

## HAPPINESS ACADEMY IN LENDAVA, SLOVENIA

*Maitreya’s Summer visit to Europe had one of its highlights in Lendava, Slovenia, during the one-week Happiness Academy organized*

*by the European Raelian Movement. Pierre Gary who is the new leader of the European Raelian Movement was obviously happy to see the 450 participants laugh and enjoy every moment of Maitreya’s teachings. This Summer academy was such a great success that all facebook addicts couldn’t stop commenting on it for days after, all sharing pictures and the quotes that moved them. I will never be able to give a full report of what we all experienced, learning and living the Raelian philosophy for a full week, facing our established paradigms and choosing who we really want to be. But for those*

*who couldn’t attend or those who are considering attending the up-coming ones, here is some food for thought...the theme of that week’s academy was ‘laughing’.*

### WORDS OF MAITREYA TAKEN FROM NOTES:

.....  
.....  
The best laugh is when we laugh at ourselves because laughing at others can be unhealthy. When we laugh at ourselves, we elevate ourselves. But what is even bet-

ter, is to laugh with oneself.

.....  
.....You have been told to look smart, to study, to get diplomas. All their lives, people try to prove that they are smart. It only proves that they are not. If one is smart, one doesn’t need to prove it. When we are not sure, we spend time to make others believe it, but the more we try to make people believe we are smart, the less we

are. The more stupid we are, the more we pretend to be intelligent, which is a source of depression. But the more we are intelligent, the more we act stupid... remember the picture of Einstein :-)

.....  
 The Elohim made everything to make us laugh. Look at the crabs, the peacocks..., the evolutionists :-) You are at the Happiness Academy to be happy... Normal people need a reason to smile and be happy. I want you all abnormal, laughing and smiling without a reason, giving happiness to others through your

laughter and smiles, happy that your happiness gives happiness to others. The smile of a person who smiles because of you is important. This is our goal: to make a planet happy. And the objective of the Maitreya is to transform all of you into laughing Buddhas to make this planet happy

.....  
 Everything that laughs is a biological robot capable to understand it's surrounding and to get pleasure out of it. The awakened

being is someone who laughs at everything including nothing.

.....There is an obvious contradiction for the being who is awakening, between the need to meditate and the need to laugh all the time. But both work together. When we meditate, there is an inner laugh within our cells happening. If you meditate seriously, you waste your meditations. The only thing one should do seriously is to play. When I play, I play seriously, because I play. ;-) Everything else, I do while laughing. Laugh when you pray to the Elohim, don't cry like Christians do. Your laughter is the most beautiful prayer. Better not pray if it is a sad prayer. *(Jahwang on the picture on the right is a Buddhist monk from South Korea who became a Guide Assistant at the*

end of this Academy. He is the Maitreya's ambassador to the Buddhist community. His outer smile reflects years of inner smiles through the practice of meditation. Raelians of Europe had such a pleasure discovering him as well as following the meditations he was leading, the way he leads them in his temple in Korea. ).....

.....Some say "how can we be happy when we think of all those people who suffer on this planet?" One cannot help the planet by crying. If I am offered food, I will eat with pleasure, taking energy to help those who have nothing. If you are hungry, you can not help those who are starving. Enjoy what you have while thinking of those who have nothing, and you will have more strength to help them. Pray and meditate while laughing because praying and meditating should not be serious.

*(the Guides on the picture above*

*are practicing this teaching) .....When we make a*

prayer, we pray to the infinite, we pray to the messengers of the infinite. To pray is to send love without expecting anything in return. You send vocal or silent vibrations which make your body and your brain vibrate which elevates you. When you pray, you must direct your thoughts towards something which elevates you. *(on the right, Rebecca who created a meditative song-prayer that touches us all... Shalom, Salam, Elohim, Amen... We couldn't stop*

*singing-humming it!)*

.....

You can fall in love every morning, without an object of love. Or rather you can elevate yourself to love, without an object of love. You can laugh for no reason and about everything and be in love with no one yet with everything. You can put yourself in this state of love without any outside help. Why let a person outside of you be responsible for this extraordinary state of love trance which makes the colors brighter, which makes you want to sing... why let a stranger who can let you down the next day be responsible for it? Why not create it on your own? If you can succeed, you are a Buddha. To be a Buddha is to be in love with nothing and everything while having the same reaction, the same enthusiasm, the same inner wonder as when you are in love with a person yet not being attached to anyone or to anything. To be detached and in love, that removes one of the greatest parasites of love which is jealousy. If you are detached and in love, then you are not jealous because jealousy comes from attachment. You can then be in love with everyone, with the planet, with the infinite. Everything becomes the reason of your love excitement... the eyes of each person, a flower that blossoms, a star that shines. Be in love with yourself, with everything, without an object, then you are completely freed. And if you chose to live with a partner, and your partner is not necessary for your happiness, then your relationship will be a lot greater...

.....Happiness is a choice. On a happiness scale from 0 to 100, you can only be 100 because it is a decision. When you decide to be happy, you put your neurones in a happiness quest. When you wake up, you send blood in your left frontal lobe and you start laughing. The day will then become a great laughter explosion while you rejoice from simple things. ....

..... A dreamer makes others dream. A smiler makes others smile. Everything

which is not socially necessary is important. Art and spirituality have no social use, but are extremely important. Poetry is supposed to be superfluous, there is no Minister of poetry or spirituality; there is no Minister of the future either, yet it is so important.

Kimbangu, National Guide for France and a great Poet has been nominated Guide Level 5.

When you bring this superfluous, this uselessness, you make people dream, like the Buddhist monk does with his bell in Tokyo's streets. For a moment, the passers-by stop and question their lives. They keep something of this vision. For a moment, they dreamed. It is important to take the time to dream. Us Raelians have our heads full of dreams and we make the planet dream too. We propagate dreams while realizing concrete things, like the pleasure hospital. The pleasure hospital is not just a hospital; it brings dreams to many people. The same way, the Embassy that we will build brings dreams. We build it first in our heads which is more important than building the Embassy itself. The path of dreams that we are following is magnificent. We are climbing a mountain while dreaming of its summit but it is almost sad that the mountain has a summit. The one with a limited consciousness longs to see the summit. The one with an infinite consciousness rejoices to climb the infinite mountain.

Two new Guides were also nominated , Brent from UK (above) and Dennis from Holland (left)

### TESTIMONY BY IPHIGENIE

“You who can write, why don't you propose something about the Happiness Academy”

The subject was given.

Being a disciplined student and an embryo of a self-respected literate woman, I instantly took the initiative to assemble my knowledge on the subject, to establish a rigorous and exhaustive list of the activities we abandoned ourselves to during this week.

It is amazing how fast neuronal connections can take over! I was about to serve you a beautiful essay intro, in the French fashion, creating an imbroglio of limited interest that, I am almost certain, you would not have digested.

My text will then rather be practically anchored in the direction of our philosophy. This shall better retransmit all the riches that this great gathering allowed us to develop: anti-conformism, love, happiness and most importantly laughter, the theme of the year.

From this point of view, I realized this week the power of decision that we are able to exercise upon ourselves. Raelians are known to laugh and have fun with a mind-blowing ease, definitely greater than the average of the inhabitants of this planet. Yet this week, we beat our own record.

Just imagine more than 450 people. 450 people who love each other, gathered in one room, with a common goal: instant happiness.

Yes the more the merrier! And the more we laugh, the more we are ourselves... well, if it is what I get, I don't mind that everyone thinks I'm crazy. Because to laugh is to express this happiness which is “written in our genetic code”. Those are the words from the Maitreya who's laugh is as intense as his correlative wisdom.

This explosive week was also alternatively giving room to an inner laugh, silent yet even more orgasmic. This inner laugh does not perish. I have the pleasure of expressing it in every one of my moves, my intentions, in every word that I have the pleasure to share with you today.

The “Little clown” that I am comes out. “ You laugh about nothing! They tell me. About nothing? I laugh because I am alive! It is a rather good start!”

I laugh because I am happy, I laugh at and with myself. I laugh

about my old fears, of this ancient and collective fear of the unknown which brought me agony and anxiety for much too long.

Today, I throw myself into the unknown to better get to know it...

I do it like Jahwang, Raelian Buddhist monk who follows his spiritual path while discovering science. Like our scientists who humbly discover the wisdom of the Raelian

Pierre Gary, Europe Continental Guide and Philippe Chabloz, National Guide of Switzerland

philosophy. I was at the Happiness Academy last year. I was observing, listening, discovering. This year, I lived it. I was this time able to admire, to receive and integrate the words of the Maitreya, the words of our Creators!

I can still remember Daniel Chabot on stage asking us to consciously disconnect the neurones of our choice, the neurones that are the result of interference, of external, social and cultural pressures. We then had to make this disconnection solid by writing the object of this decision on a blank page. For me it was childishly easy. 6th of August, 3pm, transmission.

Today I know for sure that like Orev who broke her neurones of modesty, I will never be able to wear again those grey clothes which covered my consciousness for so long. You are dubious about this analogy? You shall laugh, I already do so.

Till next year.
